# HS-DOW: test method

- DOW 0, 1, 10, 100, 500, 1000, 2000 bands are overwritten by MPEG1 Video file.
- Step 1 : Physical evaluation by (over)writer
- Step 2: Play-back test by ROM drives. Evaluation includes block read out and video file play back.

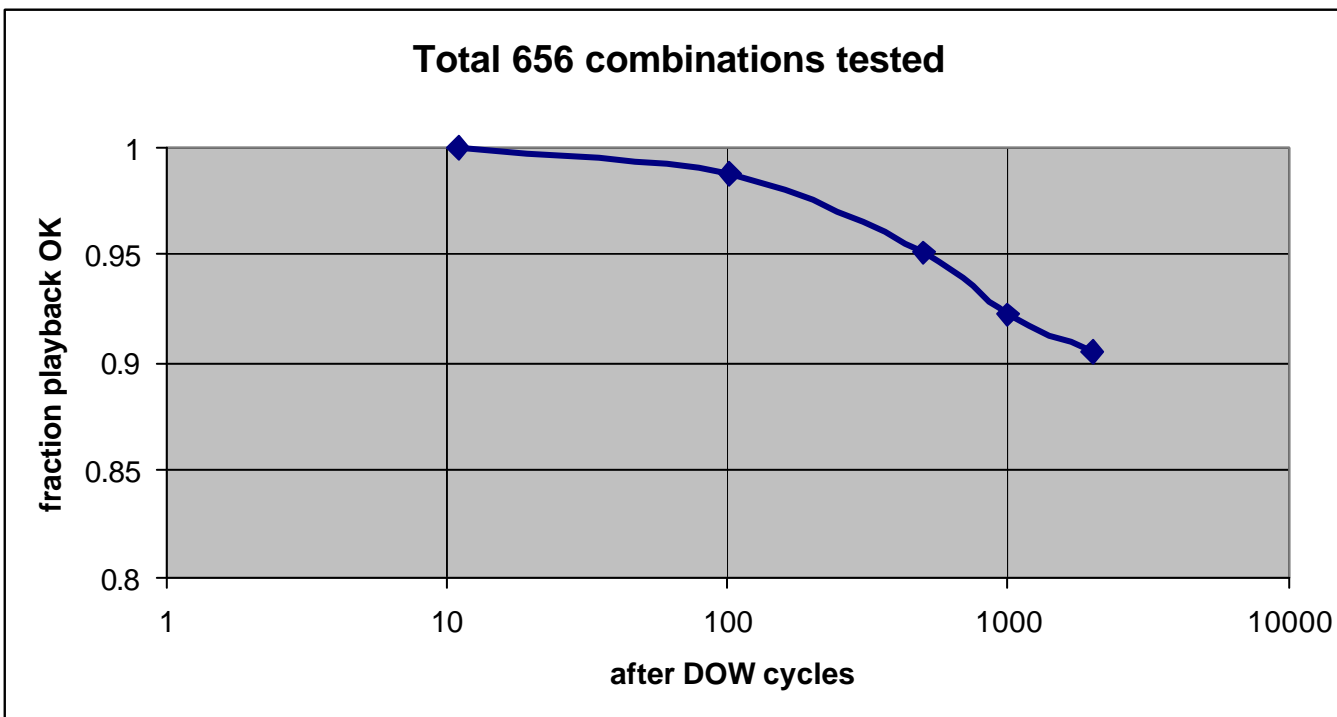

# HS DOW: participants

- 12 writer x 7 media combinations were tested.
- 13 drives performed playback test of all combinations.

# HS DOW: conclusions

- Over 90% of all combinations tested could be played back even at DOW2000!
- One drive showed worse cyclability than others in combination with some media.
